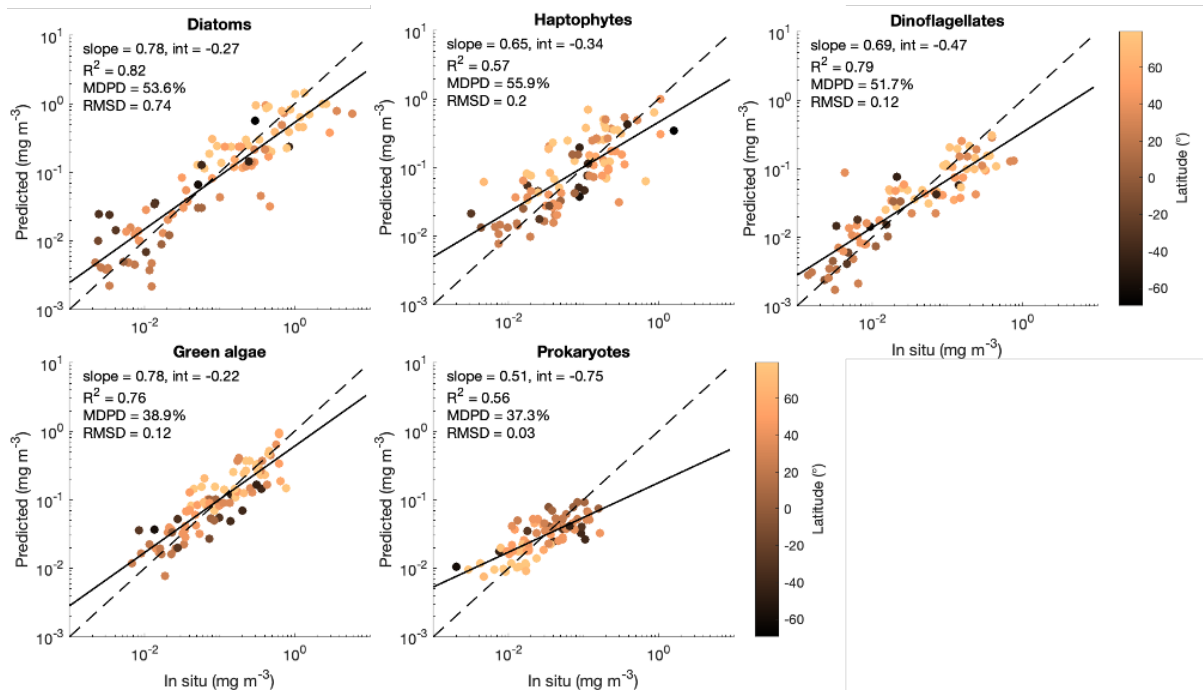

Figure S1. Original PFT Chla derived from OLCI sensors in comparison with in situ PFT dataset 1 (corresponding to Figure 3a, global data set from 2016 to 2021, maximum number of points N=99 but varies for different PFTs due to possible absence).

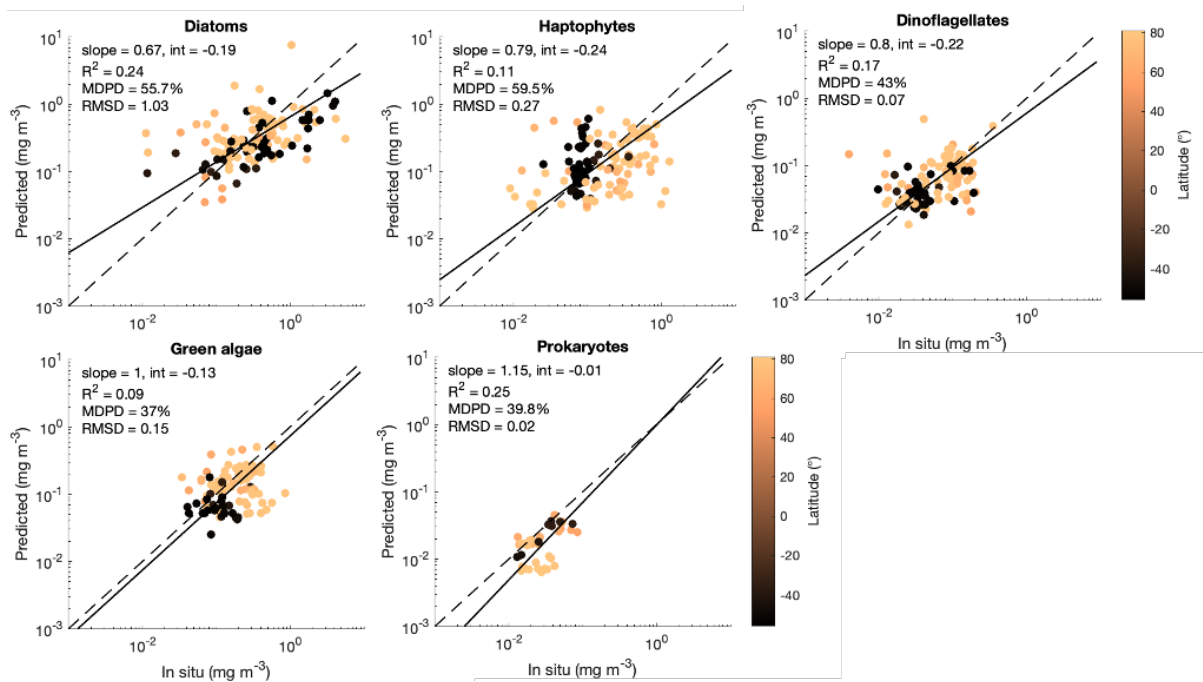

Figure S2. Original PFT Chla derived from OLCI sensors in comparison with in situ PFT dataset 2 (corresponding to Figure 3b, only own expeditions in high latitudes from 2021 to 2023, maximum number of points N=134 but varies for different PFTs due to possible absence).
