PREAMBLE

It is essential that the development of the Best Practices Guide for Ocean Alkalinity Enhancement Research is not compromised by any significant conflict of interest. For this purpose, **the term "conflict of interest" means any financial or other interest which conflicts with the service of the individual because it (1) could significantly impair the individual's objectivity or (2) could create an unfair competitive advantage for any person or organization.** Except for those situations in which a conflict of interest is unavoidable and that conflict of interest promptly and publicly disclosed, no individual can serve as author of the guide if the individual has a conflict of interest that is relevant to the functions to be performed. The term "conflict of interest" means something more than individual bias. There must be an *interest*, ordinarily financial, that could be directly affected by the work on the document.

By filling in and signing this Conflict of Interest Disclosure document, we will ensure that all information provided in the Best Practices Guide is unbiased and follows best scientific practices.

Google.org funded a project by Saildrone. In turn, URI became a subcontract to Saildrone in order to execute the funded research. I hired and supervised a postdoc and worked together on this research. Saildrone offers one technology that may be useful for MRV of OAE.
