Referee Comment for „Unusual Coccolithophore Blooms in Scottish waters"

1- An initial paragraph or section evaluating the **overall quality** of the preprint ("general comments")
In my opinion, the authors have thoroughly applied comments and suggestions from the first review process. The manuscript can be accepted after some minor technical corrections.

2- A compact listing of **purely technical corrections** at the very end ("technical corrections": typing errors, etc.)
Page 2
Line 36 – I would rephrase this sentence
Page 4
Line 47 – Dissolved Organic Matter (DOM)
Line 55 – lacking space between 7 and km
Page 5
Line 72 – originates in
Page 6
Line 101 – are not
Page 10
Line 152 – *Emiliana huxleyi*
Page 15
Line 241 – *E. huxleyi*
Line 241:242 – Why is it unlikely in Scottish waters? Lacks of one short sentence explaining that the pH decrease is negligible
