

## **Point-by-point response to the notification to the authors from review file validation**

**Notification to the authors:**

**1. Checking your paper, I noticed that some of your tables contain coloured cells. Please note that this will not be possible in the final revised version of the paper due to HTML conversion of the paper. When revising the final version, you can use footnotes or italic/bold font. For now, the process will continue, but please note that the final version cannot be published by using coloured tables.**

**We have removed the color in Table1.**

**2. Your reference list includes works “submitted to”. Such works can be cited upon submission if being available to the reviewers. They should not be cited in the final, accepted manuscript, unless published, accepted for publication, or available as preprint with a DOI.**

**We have updated the reference with the doi of the associated preprint.**

**Notice that this article is presently in the final phase of the review (with minor corrections) in the same issue (Ocean State Report) of the State of the Planet journal.**
